

Affidavit of Evidence

Testimony 1

This statement is made voluntarily to declare the first piece of evidence discovered. The attached photographs clearly depict the item as retrieved from the scene on the date of the incident. The item, handwritten notations or comments, are then written in a handwriting note, word for word in the development of personal effects. Initial forensic analysis indicates a strong match to the defendant's handwriting style, providing a crucial link. Further examination is pending to confirm the ink composition and date of writing.

Testimony 2

The following evidence was recovered from the secondary location during a consented search. The items include digital records and physical artifacts that corroborate the findings from the initial investigation. The digital files were extracted from a secure hard drive and contain timestamps and metadata linking them to the relevant period. The physical artifacts include a set of tools with wear patterns consistent with those used at the scene.
