

AFFIDAVIT OF EVIDENCE

Testimony 1

On the date of October 26th, 2023, at approximately 14:30 hours, I observed the subject entering the property gate at the main street. The subject was carrying a large, dark duffel bag and appeared to be moving hastily. These notes, listing and descriptions are part of my surveillance duties in relation to the ongoing investigation. This initial observation marked the beginning of the documented evidence collection phase.

Testimony 2

Subsequent to the initial observation, further examination of the premises on November 1st, 2023, yielded additional physical evidence. A forensic analysis conducted on the retrieved materials confirmed the presence of trace substances consistent with the alleged activities. The chain of custody for all collected items has been strictly maintained, and all procedures adhered to established legal protocols.
